  Connecting with the center of the chair

- Safety

  Air, water and electricity are seperated

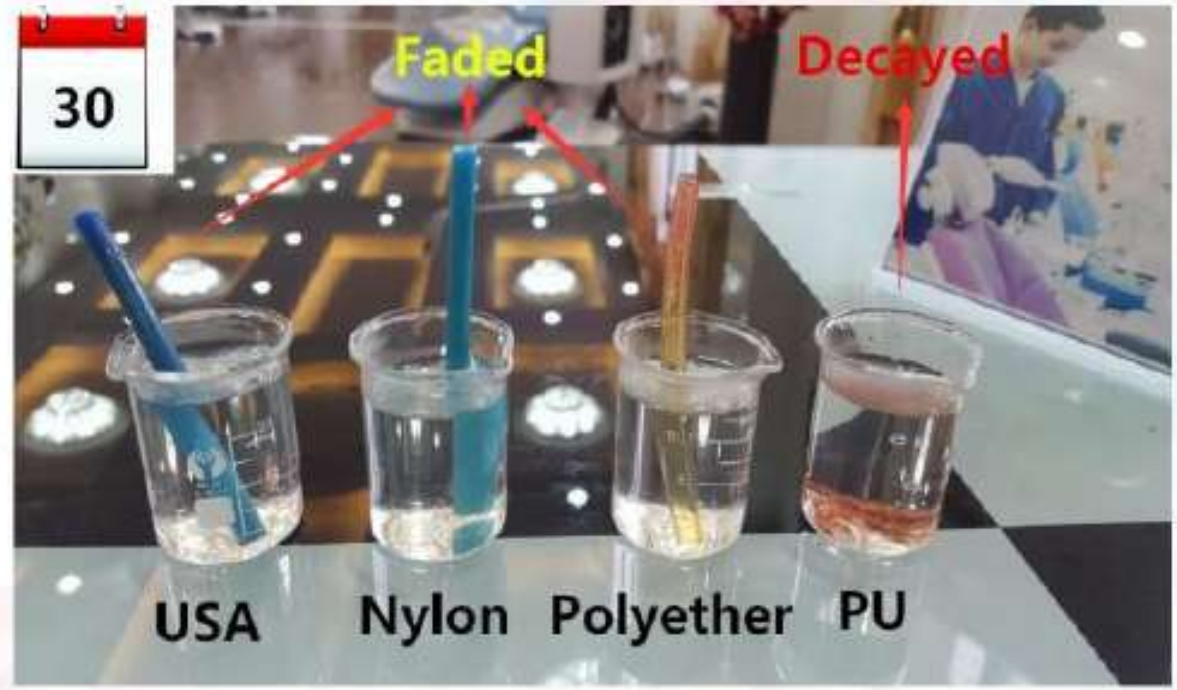

Polyether water/air tubings, 5 years or even longer life span.

Testing of water & air tubing with strong acid

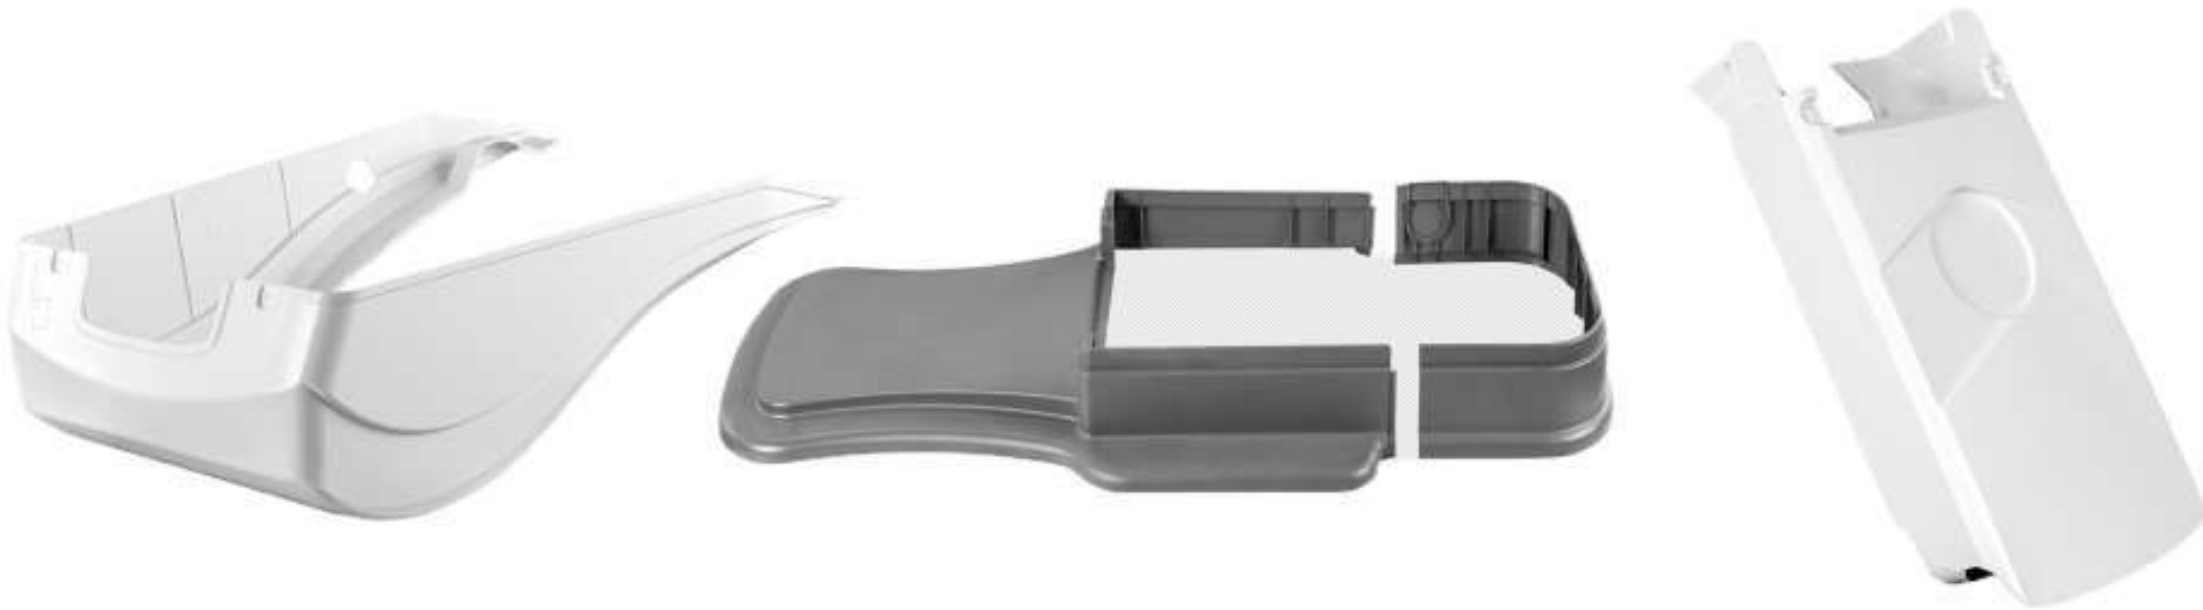

Day 1

After 30 days...

After one month, the "normal PU tube" was broken and corrupted. At the meantime, the "imported USA tubing", "polyether tubing", "nylon tubing" just became transparent, indicating that they are very durable.

LEFT STYLE

Support upgrade of full-course disinfection function (Optional)
All-round escort for your safety.

Sterile water circuit design.

Integrated water circuit design for treatment covers handpieces, three-way syringe, dental drill, and mouthwash, providing a hardware foundation for oral disinfection.

Pipeline disinfection and flushing system.

Equipped with 2 water bottles, it continuously provides disinfectant for the disinfection of the entire pipeline of the machine, removes pathogenic microorganisms in the pipeline, and keeps the equipment clean. No matter before during or after surgery, it can minimize cross infection and protect the diagnosis and treatment safety of patients and doctors.
